

Amendments to the Claims

1. (Currently amended) A mowing device comprising;
 - a frame having a ~~first~~ right side and a ~~second~~ left side,
 - a first pair of ground wheels mounted on said ~~first~~ right side of said frame,
 - a second pair of ground wheels mounted on said ~~second~~ left side of said frame,
 - means for remotely controlling the speed and direction of rotation of said first pair of ground wheels,
 - means for remotely controlling the speed and direction of rotation of said second pair of ground wheels independent of the speed and direction of rotation of said first pair of ground wheels,
 - a deck vertically adjustably attached to said frame, and
 - a vegetation cutting blade rotatably attached to said deck.
2. (Currently amended) A mowing device according to claim 1 wherein said means for remotely controlling the speed and direction of rotation of said first pair of ground wheel comprises a first remotely controllable motor mounted on said ~~first~~ right side of said frame and said means for controlling the speed and direction of rotation of said second pair of ground wheels comprises a second remotely controlled motor mounted on said ~~second~~ left side of said frame.
3. (Original) A mowing device according to claim 2 wherein said deck includes a retractable segment and remotely controlled means for raising and lowering said retractable segment.

4. (Original) A mowing device according to claim 2 further comprising;
a remotely controlled internal combustion engine mounted on said deck, and
a remotely controlled clutch connecting said remotely controlled internal
combustion engine to said vegetation cutting blade.
5. (Original) A mowing device according to claim 4 wherein said internal combustion
engine is a two cycle gasoline engine.
6. (Original) A mowing device according to claim 5 further comprising a plurality of
rollover bars attached to said deck.
7. (Currently amended) A mowing device comprising;
a frame having a first right side and a second left side,
a deck detachably attachable to said frame at any one of a plurality of heights,
a vegetation cutting blade rotatably attached to said deck,
a first pair of ground wheels mounted on said first right side of said frame,
a second pair of ground wheels mounted on said second left side of said frame,
a first remotely controlled hydraulic pump mounted on said deck,
a first hydraulic motor mounted on said first right side of said frame, said first
hydraulic motor being hydraulically connected to said first remotely controlled hydraulic pump
and said first hydraulic motor being mechanically connected to said first pair of ground
wheels,
a second ~~remotely controlled~~ hydraulic pump mounted on said deck, said second
hydraulic pump being remotely controllable independent from said first hydraulic pump , and

a second hydraulic motor mounted on said ~~second~~ left side of said frame, said second hydraulic motor being hydraulically connected to said second remotely controlled hydraulic pump and said second hydraulic motor being mechanically connected to said second pair of ground wheels.

8. (Original) A mowing device according to claim 7 wherein said deck includes a retractable segment and remotely controlled means for raising and lowering said retractable segment.

9. (Original) A mowing device according to claim 7 further comprising;
a remotely controlled internal combustion engine mounted on said deck and
a remotely controlled clutch connecting said remotely controlled internal combustion engine to said vegetation cutting blade.

10. (Original) A mowing device according to claim 9 wherein said internal combustion engine is a two cycle gasoline engine.
